2. About TrueData

- A. **TrueData Financial Information Pvt. Ltd.** is a leading provider of real-time market data APIs for Indian stock and commodity exchanges. As an official real-time data vendor for **NSE, BSE, and MCX**, we offer **ultra-low latency, high-accuracy data** solutions designed for traders, investors, algo traders, and financial technology platforms
- B. Since our inception in 2007 with the launch of True Data Financial Information Pvt Ltd., we have been at the forefront of market data innovation. Our proprietary APIs, along with our **flagship product Velocity**, provide seamless real-time and historical data access through advanced plugins and direct exchange feeds.
- C. Our APIs offer extensive market coverage, including **corporate action-adjusted market data, corporate announcements, option Greeks, financial reports, and shareholding patterns**. To simplify integration for trading platforms and fintech developers, we provide **ready-made API modules, such as symbol master, option chain, top gainers/losers, company logos, 52-week high/low, and much more**.
- D. Driven by our motto, "**Positioning You for Profits!**", TrueData empowers traders with **accurate real-time data, advanced analytics, and seamless API integration**, ensuring **better decision-making and execution efficiency**.

3. The TrueData API Advantage

TrueData continuously innovates to provide **best-in-class APIs and data integration solutions** that meet the evolving needs of **professional traders, fintech platforms, and algo trading systems**.

Key Features & API Offerings

1. Ultra-Low Latency Real-Time Market Data Feeds

- Direct connectivity to NSE, BSE, and MCX ensures lightning-fast data delivery.

- Optimized for high-frequency trading (HFT), algo trading, and automated systems.
- Institutional-grade data feeds with minimal latency, ensuring accurate trade execution.

2. Advanced Data Infrastructure for High Performance

- Our backend is optimized for handling massive volumes of tick data efficiently.
- 99.9% uptime ensures reliable, stable, and uninterrupted market data access.
- High-speed delivery with minimal packet loss, crucial for professional trading strategies.

3. Seamless REST API Access

- Easily integrate real-time and historical data into trading platforms, research tools, and mobile apps.
- REST APIs provide access to: real-time price updates, corporate actions, option chain data, financial reports, and more.
- Flexible data formats (JSON, CSV, Binary) for easy customization based on user needs.

4. Developer-Friendly Libraries & SDKs

- We offer plug-and-play libraries to make integration effortless:
- Python: TrueData Python Library – Ideal for algo trading, backtesting, and research.
- Node.js: TrueData Node.js Library – Perfect for real-time streaming and web-based trading applications.
- C# .NET: TrueData .NET Library – Designed for Windows-based trading systems and enterprise applications.

5. Ready-Made API Modules for Easy Integration

- TrueData provides pre-built API modules for seamless integration with trading platforms:
- Symbol Master API – A complete database of all tradable instruments on NSE, BSE, and MCX.
- Option Chain API – Live option chain data with bid-ask spreads, open interest, IVs, and Greeks.
- Top Gainers/Losers API – Quickly fetch top-performing and worst-performing stocks based on real-time metrics.

- Company Logos API – Retrieve official stock symbols with logos for a visually enhanced user experience.
- 52-Week High/Low API – Identify stocks hitting their yearly highs or lows for trend analysis.
- More API Modules Continuously Added for advanced market insights.

6. Scalable & Flexible Data Streaming – No Symbol Limitations

- TrueData provides unlimited real-time market data streaming with two powerful modes:
- Limited Feed (Pub/Sub Model) – Best for retail traders and small-scale algo traders. Users subscribe to specific symbols and receive real-time price updates, optimizing bandwidth and efficiency.
- Full Market Streaming – Built for HFTs, institutions, and fintech platforms. As soon as a user connects, all trades for the subscribed segment stream automatically—tick by tick—without any symbol limitations. This mode delivers the full depth of the market in real time, making it perfect for market-making, algo trading, and deep market analysis.
- No restrictions. No delays. Just pure, real-time market action.

7. Streaming Candle Data API

- Real-time candle updates for 1-minute and 5-minute bars for live trend analysis.
- Perfect for intraday traders, scalpers, and automated strategies.
-

8. REST API Access to Historical Market Data

- Access to tick-by-tick, intraday, and EOD data via REST APIs.
- Data is fully adjusted for corporate actions (splits, bonuses, dividends, rights).
- Note: Historical market data access is available via our APIs, subject to compliance with exchange regulations.

9. Corporate Announcements & Financial Reports APIs

- Get real-time earnings reports, shareholding patterns, and key disclosures.
- Integrate fundamental analysis into trading strategies.

10. Option Greeks API

- Real-time Delta, Gamma, Theta, Vega, and Rho for precise option trading strategies.

11. Continuous & Contract Futures API

- Access both continuous futures and specific contract futures simultaneously (e.g., NIFTY-I and NIFTY20MARFUT).
- Essential for backtesting, technical analysis, and automated trading.

12. Premium Adjusted Continuous Futures API

- Seamless long-term analysis with adjusted continuous futures at rollover (NIFTY-IP).

13. Extensive Market Coverage & Real-Time Data Access

- Tick-by-tick data for 60,000+ symbols across NSE, BSE, and MCX.
- Instant access to intraday and EOD data, covering all market segments

14. Unmatched API Support & Customer Service

We provide dedicated API support through multiple channels.

- Live Chat & Phone Support – Get real-time help from our experts.
- Email & Ticketing System – Submit queries and receive fast resolution.
- Remote Setup via TeamViewer – Hassle-free API integration assistance.
- Comprehensive Knowledge Base & FAQs – Self-service troubleshooting for smooth implementation.

Why Choose TrueData?

1. Official Data Vendor for NSE, BSE & MCX
2. Ultra-Low Latency & High-Performance APIs
3. Seamless REST API & Streaming Access
4. Scalable, Enterprise-Ready Solutions
5. Comprehensive Market Data Coverage
6. Dedicated Technical & Developer Support

4. API Specifications

a) Overview

- i) TrueData API provides Real Time streaming of corporate announcement via Websocket also the announcements and other corporate data (e.g. results and share holding patterns etc) is provided via REST API.

User/client would need to connect to the WebSocket port for which they wish to receive the announcements.

- ii) In case historical data, then the client would need to login to the REST service using the same credentials and obtain the auth token (bearer token) which would be needed for each subsequent request.

Auth URL for login / authentication > <https://auth.truedata.in/token>

Note: Token generated for accessing Rest API are valid till 10:30 PM GMT or 4 AM IST (next day). The access token should be renewed once every day at around 4 am IST. A fresh token needs to be obtained at that time to continue using the service without any interruptions

- iii) Rest API URL for Corporate requests > <https://corporate.truedata.in/>

Request rates are currently limited for historical corporate as follows. (This includes all REST calls): -

- a. Calls in 1 second – 1 (Max)
- b. Calls in 1 minute – 60 (Max)
- c. Calls in 1 hour – 3600 (Max)

- iv) In case there is no data available for the date time range, given in the request, then you will get a message like so: -

"No Data exists for Symbol/Date Range"

b) Corporate Announcement over WebSocket

i) Connecting WebSocket

Feed URL	wss://corp.truedata.in:9092?user=enter_your_id&password=enter_your_pwd
Port	9092

ii) WebSocket Response

Corporate Announcement Response JSON	<pre>{ "id":89016, "Script_Code":null, "CompanyName":"Ironwood Education Ltd", "Filestatus":"N ", "Symbol_Bse":"IRONWOOD_BSE", "Symbol_Nse":"", "HeadLine":"Board Meeting Outcome for Intimation Under Regulation 30 Of SEBI (LODR) Regulations, 2015 - Outcome Of Board Meeting Held On December 2, 2024", "NewsSub":"Board Meeting Outcome for Intimation Under Regulation 30 Of SEBI (LODR) Regulations, 2015 - Outcome Of Board Meeting Held On December 2, 2024", "NewsBody":"Pursuant to Regulation 30 of SEBI (LODR) Regulations, 2015, please find attached herewith the Outcome of Board Meeting held on December 2,2024", "Descriptor":"Outcome of Board Meeting", "CriticalNews":"0", "TypeofAnnounce":"Outcome", "TypeofMeeting":"", "DateofMeeting":"12/2/2024 12:00:00 AM", "DescriptorID":"198", "Tradedate":"02/12/2024 21:07:34" }</pre>
--------------------------------------	---

c) Corporate Data over REST API

Getting Symbol List (Scrip Master)

- a) **Search for a symbol / symbol keyword in the masters** - Another way to get the symbol id list would be to search for the symbols (recommended) or request

for the entire masters (not recommended) from the following mentioned URL to get the master files in Json format: -

https://api.truedata.in/getAllSymbols?segment=eq&user=your_user_id&password=your_password

Please change the segment in this URL as desired by you: -

1. segment=eq – Equity Master (NSE)
2. segment=bseeq - Equity Master (BSE)
3. segment=all – Full master (all segments)

**Please note that it is not necessary to download the master files as the symbol ID is returned once a symbol subscription request is sent (as shown below).*

**The instrument list API returns large amounts of data. It's best to request it once a day (ideally at around 08:30 AM) and store in a database at your end.*

**JSON format – removing &csv=True would give you the response in JSON format. Note that this would increase the download size and could take longer to download*

**&allexpiry=true would download all the symbols (including all expired symbols) in the TrueData database. This could be a huge list and it is recommended to use the &search command instead as explained above.*

API Authentication

- a) The first step in the authentication process is to obtain the token which can be used for subsequent requests. This is a POST request like so: -

Service URL	https://auth.truedata.in/token
Request Method	POST
Format	x-www-form-urlencoded
Request Parameters	username <user-id> password <user-pwd> grant_type password

HTTP TD Auth / Auth Request

POST ▼ <https://auth.truedata.in/token>

Params Authorization Headers (9) **Body** ● Scripts Settings

☐ none ☐ form-data ☒ x-www-form-urlencoded ☐ raw ☐ binary ☐ GraphQL

	Key	Value
☒	username	{{userid}}
☒	password	{{passwd}}
☒	grant_type	password
	Key	Value

b) The above request typically sends JSON response as follows: -

Response	JSON
Sample Response	<pre>{ "access_token": "og6zhJqQZuLAT54CpwPFNI8yOhC RasyMiO6eMS62YF19A9tAMkgqJNP4LreC2vt_muHKpcMOisi wPZgHZNmXwvfplKvU3SVZJ2QMtET3oeAMT8smgAP9HIxLTYn QJIMJ_QB0xYWGe5efwGO4Kwun16nZ9GvNdQyPhPNed5t- oRajdg_bSGdzb8XusmMbctC5aiCE2w2dcknuWKm6v8folpLD6 VvYBhEIHWxguePUuTfNztsZyVDyLn4p_vlwmquxDtt5BHqQfSksq_zy9hA", "token_type": "bearer", "expires_in": 13961, "userName": "True1234", ".expires": "Sun, 21 Mar 2021 22:30:00 GMT", ".issued": "Sun, 21 Mar 2021 18:37:18 GMT" }</pre>
Response parameters	access_token : will be used in subsequent request to retrieve data expires_in : token validity in seconds Token_type: bearer (type of token)
Error 1	<pre>{ "error": "invalid_grant", "error_description": "The user name or password is incorrect." }</pre>

Error 2	{ "error": "invalid_grant", "error_description": "User subscription expired." }
---------	--

Get Descriptor List

- a) Descriptors (related to descriptor id of corporate announcement) can be retrieved using the following request. This is a GET request like so: -

Service URL	https://corporate.truedata.in/getdescriptors?response=csv
Request Method	GET
Headers	bearer your-token – supply token obtained from auth service in header
GET Query string Parameters	response=csv/json – response type required

Above request typically sends CSV or JSON response as follows: -

Response	CSV/JSON
Csv	id,descriptor,category 1,General,General Announcement/ General Updates 2,Acquisition,Announcement under Regulation 30 (LODR) 3,AGM,Shareholder Meeting / Postal Ballot....
Json	{ "status": "Success", "Records": [1, "General", "General Announcement/ General Updates"], [] .. }
Response parameters	Id – Unique id number comes with announcement descriptor - descriptor related to id category – General Update, Results etc.

Error Response1	API calls quota exceeded! maximum admitted X per Second.
Error Response2	Segment not subscribed
Error Response3	Authorization has been denied for this request.

Corporate Announcements List API

- a) **The default response format is csv.** JSON responses are also possible. We recommend choosing the csv response format as it ensures comparatively smaller bandwidth usage for the same data thereby enabling faster delivery over the internet.

- b) Sample Request:

Service URL	https://corporate.truedata.in/announcements?from=241129&to=241130&response=json&top=5&symbol=TCS
Request Method	GET
Headers	<i>bearer</i> your-token – supply token obtained from auth service in header
GET Query string Parameters	from=241129 – from date yymmdd to=241130 – to date yymmdd response= json/csv top=5 – if need only top n rows symbol=TATATMOTRS – if need to fetch for one symbol (NSE symbol name can be specified here) (symbol is optional parameter)

- c) CSV columns are as follows:-

1	Id	Unique announcement id
2	trade_date	Timestamp
3	script_code	BSE Script Code
4	symbol_nse	NSE Symbol (e.g. TCS)
5	Symbol_bse	BSE Symbol (e.g. TCS_BSE)
6	company_name	Company full name
7	file_status	Result Filing Status
8	news_headline	News Headline
9	news_subhead	News Sub head
10	news_body	News Body
11	news_descriptor	Descriptor ID
12	announcement_type	Type of Announcement

13	meeting_type	Type of Meeting
----	--------------	-----------------

k) Sample json format is as follows:-

```
{
  "status": "Success",
  "Records":
    [
      [
        78176,
        "2024-11-29T21:38:43",
        500312,
        "ONGC",
        "ONGC_BSE",
        "Oil and Natural Gas Corporation Ltd",
        "N",
        "Announcement under Regulation 30 (LODR)-Press Release / Media Release",
        "Announcement under Regulation 30 (LODR)-Press Release / Media Release",
        "ONGC Videsh Limited acquires 0.615% Stake in ACG and 0.737% Stake in BTC, Azerbaijan",
        "Press Release / Media Release",
        "General_Announcements",
        ""
      ],
      [
        78174,
        "2024-11-29T21:23:59",
        532714,
        "KEC",
        "KEC_BSE",
        "KEC INTERNATIONAL LTD.",
        "N",
        "Announcement under Regulation 30 (LODR)-Press Release / Media Release",
        "Announcement under Regulation 30 (LODR)-Press Release / Media Release",
        "We are pleased to enclose a copy of the press release with respect to new orders of Rs. 1,040 Crores secured by the Company. All the orders mentioned in the enclosed press release have been received in the normal course of business.",
        "Press Release / Media Release",
        "General_Announcements",
        ""
      ],
    ]
}
```

}}

l) To support your development process, the Postman collection for the REST API is available from this link. Please unzip the file and import it into Postman (<https://www.postman.com/>) to work with it :-

Get Announcement File (attachment)

a) Announcement file (for particular id of announcement) can be retrieved using the following request. This is a GET request like so: -

Service URL	https://corporate.truedata.in/announcementfile?id=72260
Request Method	GET
Headers	bearer your-token – supply token obtained from auth service in header
GET Query string Parameters	id=number – announcement id

b) Above request typically sends CSV or JSON response as follows: -

Response	Application/pdf				
Sample Response Csv >	<thead> <tr> <th>To</th> <th>To</th> </tr> </thead> <tbody> <tr> <td>BSE Limited, Phiroze Jeejeebhoy Towers, Dalal Street, Mumbai - 400 001 Scrip Code: 544262</td> <td>National Stock Exchange of India Ltd., Exchange Plaza, C-1, Block-G, Bandra Kurla Complex, Bandra (E) Mumbai - 400 051 Scrip Symbol: MANBA</td> </tr> </tbody>	To	To	BSE Limited, Phiroze Jeejeebhoy Towers, Dalal Street, Mumbai - 400 001 Scrip Code: 544262	National Stock Exchange of India Ltd., Exchange Plaza, C-1, Block-G, Bandra Kurla Complex, Bandra (E) Mumbai - 400 051 Scrip Symbol: MANBA
To	To				
BSE Limited, Phiroze Jeejeebhoy Towers, Dalal Street, Mumbai - 400 001 Scrip Code: 544262	National Stock Exchange of India Ltd., Exchange Plaza, C-1, Block-G, Bandra Kurla Complex, Bandra (E) Mumbai - 400 051 Scrip Symbol: MANBA				

 The email body text reads:

November 29, 2024

Sub : Manba Finance Ltd surpasses highest ever ATM of 1200 Crores.

Dear Sir / Madam,

We are happy to inform our Shareholders that Manba Finance Ltd has achieved highest ever ATM of 1200 Crores till date and availed. Company has recently raised 150 Crores from IPO in the Month of

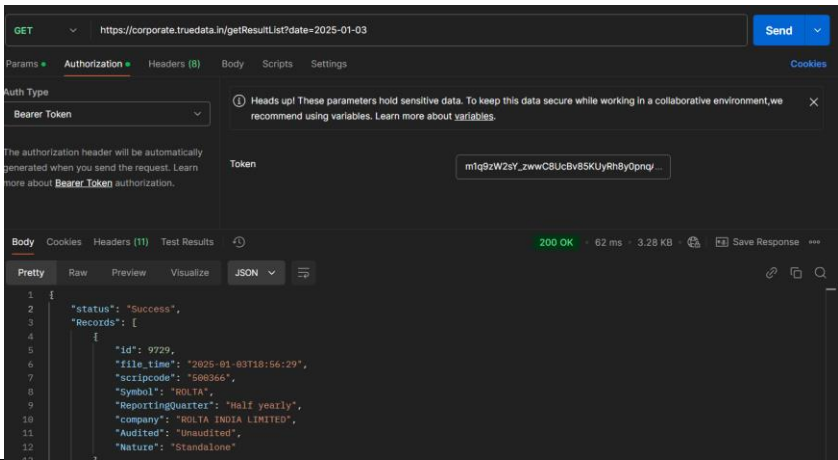

Error Response1	API calls quota exceeded! maximum admitted X per Second.
Error Response2	Segment not subscribed
Error Response3	Authorization has been denied for this request.

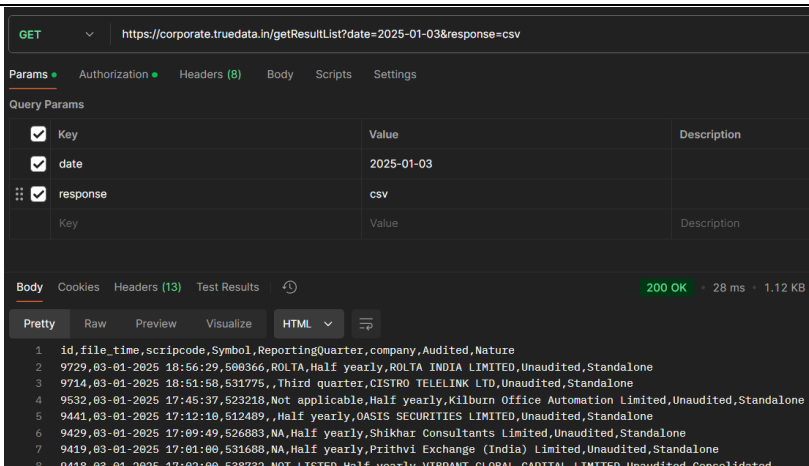

Get Corporate Result List (announced on particular date)

a) Corporate Results announced on particular date can be retrieved using the following request. This is a GET request like so: -

Service URL	https://corporate.truedata.in/getResultList?date=2025-01-02&response=csv
Request Method	GET
Headers	bearer your-token – supply token obtained from auth service in header
GET Query string Parameters	date=date – date of announcements (format yyyy-MM-dd)

b) Above request typically sends CSV or JSON response as follows: -

Response	CSV/JSON
Sample Response JSON>	 <pre> 1 { 2 "status": "Success", 3 "Records": [4 { 5 "id": 9729, 6 "file_time": "2025-01-03T18:46:29", 7 "scripcode": "500366", 8 "symbol": "HOLTA", 9 "ReportingQuarter": "Half yearly", 10 "company": "HOLTA INDIA LIMITED", 11 "Audited": "Unaudited", 12 "Nature": "Standalone" 13 } 14] 15 }</pre>

Error Response1	API calls quota exceeded! maximum admitted X per Second.
Error Response2	Segment not subscribed
Error Response3	Authorization has been denied for this request.

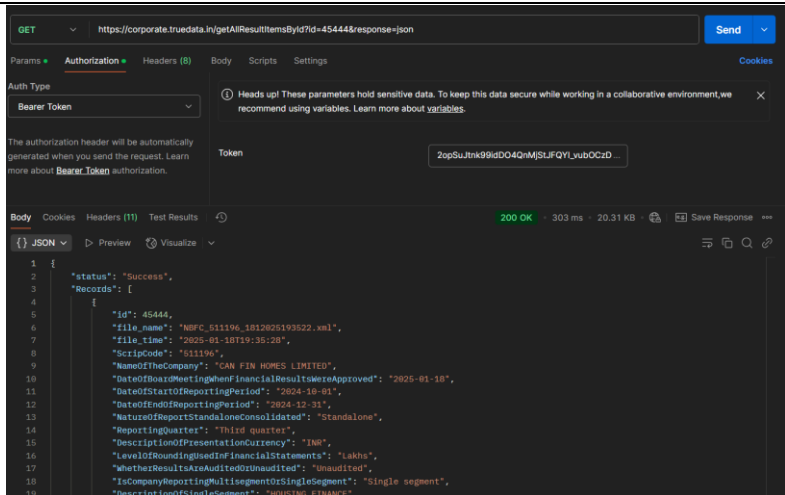

Get Corporate Results Details - All Items (by id)

a) Corporate Results Assets Items of particular company can be retrieved using by result list id. This is a GET request like so: -

Service URL	https://corporate.truedata.in/getAllResultItemsById?id=9729&response=json
Request Method	GET
Headers	<i>bearer your-token</i> – supply token obtained from auth service in header
GET Query string Parameters	id =number – corporate result id (format yyyy-MM-dd)

b) Above request typically sends CSV or JSON response as follows: -

Response	CSV/JSON
----------	----------

Sample Response JSON>	
CSV>	NA
Error Response1	API calls quota exceeded! maximum admitted X per Second.
Error Response2	Segment not subscribed
Error Response3	Authorization has been denied for this request.

Get Corporate Result Assets Liabilities (by id)

a) Corporate Results Assets Liability of particular company can be retrieved using by result list id. This is a GET request like so: -

Service URL	https://corporate.truedata.in/getResultALById?id=45444&response=json
Request Method	GET
Headers	bearer your-token – supply token obtained from auth service in header
GET Query string Parameters	id=number – corporate result id (format yyyy-MM-dd)

b) Above request typically sends CSV or JSON response as follows: -

Response	CSV/JSON
Sample Response JSON>	{ "GeneralInfo": { "ScripCode": "500357", "Symbol": "", "MSEISymbol": "", "ISIN": "INE425E01013", "NameOfTheCompany": "RAMA PAPER MILLS LIMITED", "ClassOfSecurity": "Equity", "TypeOfCompany": "", "DateOfStartOfFinancial Year": "2024-04-01", "DateOfEndOfFinancial Year": "2025-03-31", "DateOfStartOfReportingPeriod": null, "DateOfEndOfReportingPeriod": null, "DateOfBoardMeetingWhenFinancialResultsWereApproved": "2024-09-23", "DateOnWhichPriorIntimationOfTheMeetingForConsideringFinancialResultsWasInform": "2024-09-17", "NatureOfReportStandaloneConsolidated": "Standalone", "ReportingQuarter": "First quarter", "DescriptionOfPresentationCurrency": "INR", "LevelOfRoundingUsedInFinancialStatements": "Lakhs", "WhetherResultsAreAuditedOrUnaudited": "Unaudited", "IsCompanyReportingMultisegmentOrSingleSegment": "Single segment", "DescriptionOfSingleSegment": "Paper and Paper Products", "DateOfStartOfBoardMeeting": "2024-09-23", "DateOfEndOfBoardMeeting": "2024-09-23", "StartTimeOfBoardMeeting": "16:00:00", "EndTimeOfBoardMeeting": "16:45:00", "DeclarationOfUnmodifiedOpinionOrStatementOnImpactOfAuditQualification": "Not a", "WhetherCashFlowStatementIsApplicableOnCompany": "", "TypeOfCashFlowStatement": "" }, }
